Contents of *Ecological Modelling*, Vol. 52

Special Issue

ISEM's 7th Internation Conference on the State of the Art in Ecological Modelling

Editorial 3

Perspectives of ecological modelling of tropical and subtropical reservoirs in South America
J.G. Tundisi (São Carlos, Brazil) 7

Modelling the effects of air pollution on the susceptibility to respiratory infections
E. Massad (São Paulo, Brazil) 21

Mathematical simulation of pollutant dispersion
P.E. Carreras and A.N. Menéndez (Ezeiza, Argentina) 29

Some considerations on a simplified version of Leslie's model
S.M. Raimundo (São Paulo, Brazil) and A.B. Engel (Rochester, NY, U.S.A.) 41

Oil spills in mangroves: a conceptual model based on long-term field observations
C.M. Jacobi and Y. Schaeffer-Novelli (São Paulo, Brazil) 53

Shrimp fishery: Energy modelling as a tool for management
A.L. Philomena (Rio Grande, Brazil) 61

Mathematical modelling for reservoir water-quality management through hydraulic structures: a case study
M.C.A. Filho, J.A.O. de Jesus, J.M. Branski and J.A.M. Hernandez (Rio de Janeiro, Brazil) 73

Features of the limnological behavior of Salto Grande's reservoir (Argentina–Uruguay)
L.E. Berón (Buenos Aires, Argentina) 87

Modelling maximum chlorophyll in the Cabo Frio (Brazil) upwelling: a preliminary approach
J.L. Valentin and R. Coutinho (Rio de Janeiro, Brazil) 103

Organization of the dynamic network structure in the dimension of time
C. Pahl-Wostl (Zürich, Switzerland) 115

Ecosystem theory, ecological buffer capacity, uncertainty and complexity
S.E. Jørgensen (Copenhagen, Denmark) 125

Regular Papers

Transport modelling in watersheds
B. Caussade and M. Prat (Toulouse, France) 135

Simulation modelling system for aquatic bodies
A.A. Voinov and A.A. Akhremenkov (Moscow, U.S.S.R.) 181

Dissipative structures and patchiness in spatial distribution of plants
A.V. Tuzinkevich and Ye.Ya. Frisman (Vladivostok, U.S.S.R.) 207

A composite landscape ecology prognostic expert system – COLEPES. Part II. Application of the heuristic model HLEPES to prognoses of forest structures more resistant to immissions and climate change
Z. Štěrbáček, J. Pomije, V. Škopek and J. Vokoun (České Budejovice, Czechoslovakia) 225

An epidemiological model of the corn stunt system in Central America
J. Vandermeer (Ann Arbor, MI, U.S.A.) and A. Power (Ithaca, NY, U.S.A.) 235
A population-dynamics simulation model of the main vectors of Chagas' Disease transmission, *Rhodnius prolixus* and *Triatoma infestans*
J.E. Rabinovich and P. Himschoot (Buenos Aires, Argentina) 249
Outline of a physiologically based model for population energetics
N.A. Øritsland (Oslo Lufthavn, Norway) and N.H. Markussen (Oslo, Norway) 267

Book Reviews
Advances in environmental modelling 289
Entropy, environment and resources 291

Errata 293

Authors Index 295
